

## **Nu-Tech Cape Town**

Discussion is taking place to set up a Nu-Tech gathering in Cape Town in September 2018 to follow the formal World Federation conference.

Depending on the material submitted for discussion, this could take place on the Sunday 9<sup>th</sup> Sept after the WF delegates meeting, or on Monday 10<sup>th</sup>.

Because of travel difficulties, Live Streaming of the South African Nu-Tech discussion is considered a priority. Costs for this are being worked out now.

A collection of topics and items for discussion are being put together. A draft list is below.

At this stage:

- Ensuring sodium nitrite is effective as an end of life agent
- Dry monoxide generators
- Using Virtual Reality to prepare for an assisted suicide
- The electrical fibrillator
- Safe storage, preparation and use of sodium azide
- The role of the "other" barbiturates

For thoughts, comments and ideas for discussion, please contact:
